The state-run al-Thawra newspaper said in an editorial that the US "when it raised the issue of dialogue" with Syria only wanted to discuss the repercussions of the Iraqi refugee problem while "ignoring the cause."

8. Strengthen Public Understanding of Coalition Efforts and Public Isolation of the Insurgents

President Bush told reporters at a White House news conference February 14 that the Baghdad Security Plan is on track and the Iraqi government is meeting benchmarks necessary for continued Coalition cooperation.

[1.] Defeat the Terrorists and Neutralize the Insurgency

AQI Leader Captured:

- Soldiers from the 5th Iraqi Army Division captured a suspected al-Qaida in Iraq (AQI) cell leader February 15. The suspect is believed to be responsible for coordinating and carrying out several improvised explosive device and rocket attacks targeting civilians and Iraqi Security Forces (ISF) in the area.
- During the operation, in which Coalition Forces (CF) accompanied the ISF in an advisory role, several munitions caches were recovered. No civilian, ISF or CF casualties were reported.

US Post Raided by Insurgents:

- Insurgents launched a raid February 19 on a US military outpost north of Baghdad, killing two US soldiers and wounding another 17. Authorities said at least one suicide car bomber either rammed into or drove up beside two trucks carrying fuel into the base, igniting an explosion. Insurgents then opened fire with rockets mounted on a truck and from a nearby building.
- According to Iraq police officials and witnesses, US helicopters landed at least five times to evacuate casualties.
- The Iraqi Islamic State has claimed responsibility for the attack.

[2.] Transition to Security Self-Reliance – Iraqi Security Forces

Firefighters Learn Search and Rescue Techniques:

- Thirty-seven firefighters from throughout Iraq are participating in an urban search and rescue program conducted at the Basrah Training College by an international team of urban search and rescue experts.
- The 18-day course is designed to build the capacity to enter buildings that have collapsed and save the lives of people buried below the rubble. The program also trains the firefighters to assess a collapsed building's structural integrity so they can implement the correct steps to make it safe before entering to search for survivors.
- Coalition forces have provided more than \$1.2 million in equipment to conduct the training.

- The chart shows average daily power production in megawatt hours (MWh). 120,000 MWh goal equates to 20 hours at 6000 MW average supplied load or 24 hours at 5000 MW average supply load. Currently supplies are not much improved over last year when judged by hours of power, but this is due in part to an influx of new appliances. This has dramatically altered demand and diluted the effect of increased generation capacity on actual results.
